## The Edison Laboratories

instead of increasing prices without ample warning, have given us notice that the list prices of the various models of

## The NEW EDISON

"The Phonograph with a Soul"

will not be increased until January 1, 1918. Furthermore, the Edison Laboratories do not intend to pass on to the consumer the entire amount of the war tax on phonographs and records, but are absorbing a portion of it themselves.

Until January first the New Edison, "the phonograph with a soul," can be purchased at the long-established prices plus a nominal sum, which is only a portion of the estimated war tax.

Bear in mind, if you please, that it is a matter of common knowledge in the trade that the New Edison, although selling for somewhat more than ordinary talking machines, is manufactured and sold by the Edison Laboratories at a smaller percentage of profit. With this fact in mind, you will appreciate the liberal policy of the Edison Laboratories towards the consumer—a policy which invariably characterizes all of Mr. Edison's industries.

You will want to buy your New Edison before January first. Owing to the freight congestion, which seems to be growing worse instead of better, it is very difficult for us to maintain a complete stock, and we therefore suggest that you make your selection now.
